Response to Arguments

Applicant's arguments with respect to claims 14, 15, 18-21, 23, 24 have been considered but are moot in view of the new ground(s) of rejection.

The previous rejection has been withdrawn because the previous embodiment does not read on the new claims. However, the Examiner used the same prior art but with a different embodiment (see below).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Albrektsson et al US Patent 6,102,954.

Albrektsson et al discloses a condyle implant comprising a bearing plate (230) having a top articular surface and an opposing bottom surface, a stem (231) downwardly projecting from the bottom surface of the bearing plate and means for connecting (threaded-spiral surface) a fastener (254) to the stem (see Figs. 15-17).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Albrektsson et al US Patent 6,102,954.

Albrektsson et al discloses the invention substantially as claimed. However, Albrektsson et al does not disclose a maximum thickness about 2 mm to 6 mm and a stem having a range between 2mm to 6mm.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the thickness of the bearing plate and the length of the stem between ranges from 2mm to 10 mm, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Allowable Subject Matter

Claims 18-21, and 63 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 26-28, 30, 31, 38-40, 42, 43, 45-47, 50, 55, 56 and 58-62 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3738

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
